

**Barbara Del Curto**, who holds a degree in Industrial Design and a PhD in Materials Engineering, is a Full Professor of Design at the Politecnico di Milano in the Department of Chemistry, Materials and Chemical Engineering "Giulio Natta," and teaches at the School of Design.

Her scientific work, in coordination with the "Making Materials" group, which operates at the intersection of material selection, sustainable behavior, design, and engineering, focuses on the design of materials and surfaces. She emphasizes innovative, functional, and circular materials, nanotechnologies, and functional treatments, with applications across multidisciplinary fields: from packaging and furniture to jewelry and textiles.
